Professional Summary

Dedicated Full-Stack Web Engineer specializing in the MERN stack and Next.js. Selected for the priority Durbar Group engineering track at Programming Hero. Proven ability to architect responsive, user-centric web applications and dynamic routing systems. Founder and curriculum developer with a strong foundation in structured logic, problem-solving, and continuous learning.

Technical Skills

Frontend: Next.js, React.js, TypeScript, JavaScript (ES6+), Tailwind CSS, HTML5, CSS3, HeroUI.

Backend & Database: Node.js, Express.js, MongoDB, Mongoose, RESTful API Integration.

Tools & Deployment: Git, GitHub, Vercel, VS Code, Web3Forms.

Concepts: State Management (Context API), Dynamic Routing, Modular Pattern Architecture, Role-Based Access Control, Secure Payment Integration (Stripe, SSLCommerz).

PROJECTS

FitLog | *Next.js, React Context, Node.js, MongoDB, Tailwind CSS* Engineered a responsive full-stack workout logging web application. Built an intuitive dashboard for users to log daily workouts, monitor progress, and maintain structured fitness routines using seamless state management.

DevStacks | *Next.js, React, Tailwind CSS, TypeScript* Developed a comprehensive platform for engineers to construct and visualize software architectures. Implemented dynamic Next.js routing and static pre-rendering for optimal performance and SEO.

BazarDor | *React, Express.js, MongoDB, Tailwind CSS, Stripe* Architected a dynamic e-commerce platform bridging consumers and quality products. Delivered a highly responsive storefront featuring a clean UI for product browsing, secure cart management, and streamlined checkout flows.

Experience & Leadership

Founder & Curriculum Developer | Speakwip Valley (Dec 2025 – Present) Designed and implemented structured English language learning frameworks and vocabulary syllabi, demonstrating strong project management and educational structuring capabilities.

LANGUAGES

Bengali, English, Arabic, Urdu
